Step 1
## Seek for seed tasks

Agent Company

Toolathlon

WebArena

TextArena

HandCraft

M3Eval

Step 2
Unify the format for API interface

Playwright

restAPI

CDP

...

Text

MCP tools

Save Macro MCP

Execute Macro MCP

Arxiv MCP

...

Step 3
Scale the task complexity

Seed Task

Fetch one repo and extract the branch number

Entity number

Fetch **100** repos and extract the branch number ....

subtask complexity

Fetch 100 repos, extract branch counts **with contributor numbers, then analyze their correlations.**
